PROGRAM 7

Write a program to implement Single Link List with following operations : a) Sort the linked list. b) Reverse the linked list. c) Concatenation of two linked lists -

```
#include <stdio.h>
#include <stdlib.h>
#include <string.h>
struct node
{
    int sem;
    struct node *next;
};
struct node *head = NULL;
struct node *head2 = NULL;
int c = 0;
void Insert()
{
    struct node *newnode;
    struct node *temp;
    int s;
    printf("Enter integer  : ");
    scanf("%d", &s);
    newnode = (struct node *)malloc(sizeof(struct node));
    newnode->sem = s;
    if (head == NULL)
    {
        newnode->next = NULL;
        head = newnode;
        printf("first node of linked list created\n");
        c++;
    }
    else
    {
        temp = head;
        while (temp->next != NULL)
        {
            temp = temp->next;
        }
        temp->next = newnode;
        newnode->next = NULL;
        c++;
        printf("Node created\n");
```

```
    }
}
void Insert2()
{
    struct node *newnode;
    struct node *temp;
    int s, y;
    printf("enter elements to create list 2\n");
    do
    {
        printf("Enter integer  : \n");
        scanf("%d", &s);
        newnode = (struct node *)malloc(sizeof(struct
node));
        newnode->sem = s;
        if (head2 == NULL)
        {
            newnode->next = NULL;
            head2 = newnode;
            printf("first node of linked list
created\n");
            c++;
        }
        else
        {
            temp = head2;
            while (temp->next != NULL)
            {
                temp = temp->next;
            }
            temp->next = newnode;
            newnode->next = NULL;
            c++;
            printf("Node created\n");
        }
        printf("do u want to continue adding:0 or 1\n");
        scanf("%d", &y);
    } while (y != 0);
}

void bubbleSort()
{
    int swapped, i;
    struct node *ptr1;
    struct node *lptr = NULL;
```

```
    if (head == NULL)
        return;

    do
    {
        swapped = 0;
        ptr1 = head;

        while (ptr1->next != lptr)
        {
            if (ptr1->sem > ptr1->next->sem)
            {
                int temp = ptr1->sem;
                ptr1->sem = ptr1->next->sem;
                ptr1->next->sem = temp;
                swapped = 1;
            }
            ptr1 = ptr1->next;
        }
        lptr = ptr1;
    } while (swapped);
}

void reverse()
{
    struct node *prev = NULL;
    struct node *current = head;
    struct node *next = NULL;
    while (current != NULL)
    {
        next = current->next;
        current->next = prev;
        prev = current;
        current = next;
    }
    head = prev;
}

void concat()
{
    struct node *ptr;
    if (head == NULL)
    {
        head = head2;
    }
    if (head2 == NULL)
```

```
    {
        head2 = head;
    }
    ptr = head;
    while (ptr->next != NULL)
        ptr = ptr->next;
    ptr->next = head2;
}
void display1()
{
    struct node *ptr;
    ptr = head;
    int i = 1;

    if (ptr == NULL)
    {
        printf("Linked list is empty!\n");
    }
    else
    {
        while (ptr != NULL)
        {
            printf(" %d", ptr->sem);
            i++;
            ptr = ptr->next;
        }
    }
}
void display2()
{
    struct node *ptr;
    ptr = head2;
    int i = 1;

    if (ptr == NULL)
    {
        printf("Linked list is empty!\n");
    }
    else
    {
        while (ptr != NULL)
        {

            printf(" %d", ptr->sem);
            printf("\n");
            i++;
```

```
            ptr = ptr->next;
        }
    }
}

int main()
{
    int choice, pos;
    do
    {

        printf("\n1. Insert node \n2. sort node\n3.
reverse node\n4.concat 2 lists \n5.exit\n");
        printf("\nEnter your choice : ");
        scanf("%d", &choice);
        switch (choice)
        {
        case 1:
            Insert();
            break;

        case 2:
            bubbleSort();
            display1();
            break;

        case 3:
            reverse();
            display1();
            break;

        case 4:
            Insert2();
            concat();
            display1();
            break;

        case 5:
            break;

        default:
            printf("Wrong choice!\n");
            break;
        }
    } while (choice != 5);
    return 0;
```

}

Output –

```
1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 1
Enter integer  : 0
first node of linked list created

1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 1
Enter integer  : 5
Node created

1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 1
Enter integer  : 2
Node created
```

```
1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 1
Enter integer  : 4
Node created

1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 1
Enter integer  : 1
Node created

1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 2
 0 1 2 4 5
1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 3
 5 4 2 1 0
```

```
1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 4
enter elements to create list 2
Enter integer  :
9 8 7 6
first node of linked list created
do u want to continue adding:0 or 1
Enter integer  :
Node created
do u want to continue adding:0 or 1
Enter integer  :
0
Node created
do u want to continue adding:0 or 1
1
Enter integer  :
0
Node created
do u want to continue adding:0 or 1
0
 5 4 2 1 0 9 7 0 0
1. Insert node
2. sort node
3. reverse node
4.concat 2 lists
5.exit

Enter your choice : 5
